

Non-Government Standards (NGS) Program Update

*Mr. Tim Koczanski
Program Analyst, DSPO*

State of the DSP Conference –
Virtual | October 13, 2020

Background on DoD's NGS Program

- Provides guidance for implementing federal and DoD policy
- Establishes procedures for participation with Standards Developing Organizations (SDO's)
- Provides guidance on use of NGS vs Military Unique
- Fosters relationships with SDO's so they might better understand our needs

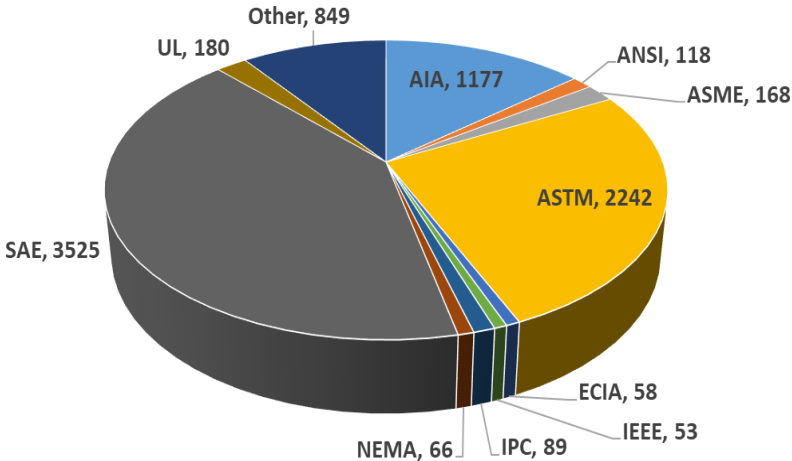

Background (Con't)

- DoD has had a long history with SDO's
- Began promoting use of NGS in 1962
- The 1980's saw an expansion of policies directed at using NGS
- 1990's- 2000's policies were strengthened to ensure NGS usage over military unique
- We've made tremendous strides in both development and adoption of NGS

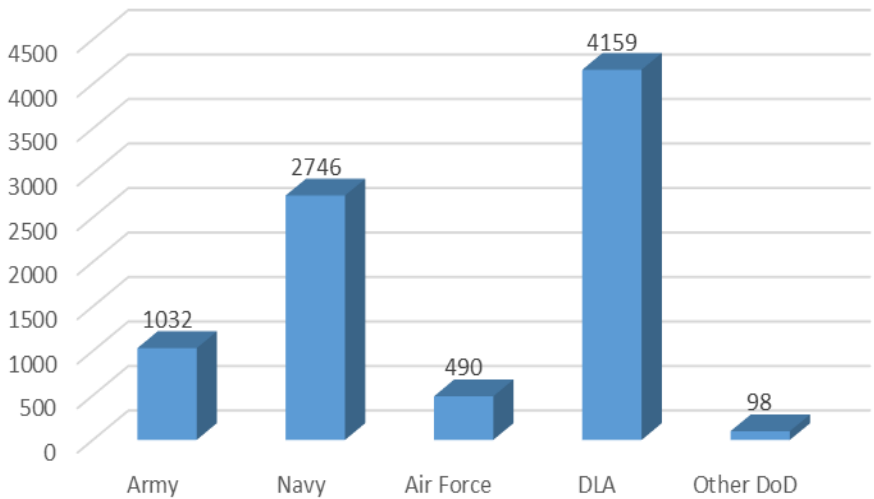

Current SDO's and NGS's adopted by DoD

DoD Adopts Documents from 90 Organizations,
90% of Adopted NGSs from 10 NGSBs

Non-government standards adopted by DoD

How ASSIST supports NGS Adoption

Overview

Title: Colors Used in Government Procurement

Scope: This standard defines a color index system used by, but not limited to, Government activities in a format suitable for color identification, color selection, color matching, and quality control inspection. It also describes the designation and use of color media that is available to conduct these activities. Use of the color index referenced in this standard is intended to promote standardization and consistency in the color of items produced for Government use.

Status: Active Doc Category: Society of Automotive Engineers (SAE) Dist Stmt: See below

Adoption Date: 14-FEB-2017 FSC Area: 8010

Next Review Due: 12-FEB-2027

Referenced By: 253

Responsibilities

Lead Standardization Activity: AS Naval Air Systems Command

Adopting Activity: SO Executive Agent for the Defense Standardization Program

Coordination: Full

Army Custodian: AT Ground Vehicle Systems Center

Navy Custodian: AS Naval Air Systems Command

Air Force Custodian: 11 Air Force Life Cycle Management Center - Aircraft Systems

Reviewer Interest: 4 (Indicates number of interested reviewers)

SAE-AMS-STD-595

TIER II ADOPTION NOTICE

COLORS USED IN GOVERNMENT PROCUREMENT

SAE-AMS-STD-595, "Colors Used in Government Procurement," was adopted on February 14, 2017, for use by the Department of Defense (DoD). Proposed changes to the standard by DoD activities must be submitted to the DoD Adopting Activity at Defense Standardization Program Office, 8725 John J. Kingman Road, Stop 5100, Fort Belvoir VA 22060. To request the addition of new colors, please send a paint sample (on an acceptable substrate) to the SAE contact below. The new sample paint color will be provided to the SAE paint manufacturer. A drawdown that exactly matches the sample sent will be created. SAE will send a proof for your acceptance and, once approved, will add the color and CIELAB data to their standard. The accepted proof would be appropriately stored and used as the standard for creating product in the future. The standard and all related color media may be obtained from www.sae.org or SAE International Customer Service, 400 Commonwealth Drive, Warrendale PA 15096.

AMSC N/A

FSC 8010

Current Initiatives Underway

- Enterprise-wide Access to Non-Government Standards via ASSIST
- Services/Agency Consolidation of Non-Government Standards Access
- Removal of waiver process as dictated by Sec 875 b(2), FY17 NDAA

Enterprise-wide Access to NGS

- Effort underway since 2013-
- Renewed effort based on FY 17 NDAA, sec. 875
 - “LICENSES.—The Under Secretary of Defense for Acquisition, Technology, and Logistics shall negotiate licenses for standards to be used across the Department of Defense and shall maintain an inventory of such licenses that is accessible to other Department of Defense organizations.”
- 15 Aug 2017 USD(AT&L) Memo to SAEs and DLA
 - “develop a plan in coordination with the Defense Standardization Program Office...This plan should consolidate access agreements, leverage existing agreements, or employ other feasible approaches to provide our technical experts with the most current information in the most affordable manner, while respecting all parties’ intellectual property interests.”

Priorities for NGS Access

- Getting access to NGS for those that need it
 - Activities do not have the documents they cite/need
- Address illegal sharing
- Cost savings through consolidated/centralized management
- Meet statutory requirements to “inventory” and “negotiate” for access to NGS (Sec. 875, FY17 NDAA)

Courses of Actions (COA)

- COA A: Services/Agencies develop independent consolidation plans,
 - ✓ Must show consolidation
 - ✓ Should define end-state, and path to achieve
- COA B: develop FY20 POM issue paper for DoD-wide consolidation—

Status

- **COA A** (*Services and DLA continue consolidation efforts*)
- Services and DLA are identifying current contracts and future needs.
- Services and DLA have consolidated contracts based on POP of current contracts

- **COA B** (*FY20 POM Issue paper for DoD-wide consolidation*)
- Status: Failed
- Forwarded to the Reform Management Group (OCMO)
- Determined not to be a good fit based on scope-
- Planned to POM in FY 23 POM Cycle

Removal of Waiver Process

- Subsection (b)2 of Section 875 of the FY17 NDAA *establish a waiver requirement for when military-unique specifications are used (instead of commercial or non-Government specs). This waiver must be approved by the milestone decision authority.*
- DSPO proposed striking the waiver, and continue with the existing review process that DoD already employs
- As a stop-gap, the USD(A&S) issued a memo granting a waiver for the use of approved military standard specifications until this waiver requirement can be removed.

Removal Of Waiver Process (Con't)

- DSPO has been working to remove the waiver from sec 875 (b)2 FY 17 NDAA for several years.
- In FY 2020, submitted proposal #65 which was approved by Legislative Review Panel (LRP) and submitted to OMB, where it stalled.
- In FY 2021 cycle submitted proposal #339 which was approved by the LRP, and approved by OMB, and sent to Congress for consideration on April 7th where it stalled again.
- We have been approved to resubmit the proposal through Acting USD R&E for the FY2022 cycle.

Way Forward

- Continue to work with OSD to remove waiver requirement.
 - There are no known defenders/proponents of Sec. 875(b)2 of the FY17 NDAA remaining on Congressional staff.
 - No Interagency concerns revealed in coordination during coordination through OMB
 - The program's policies and procedures over the past 20 years have proved current practice has reduced reliance on military specifications.
 - Military Departments and Defense Agencies fully support proposal.

BACK-UP MATERIAL

Overview of the DoD Plan

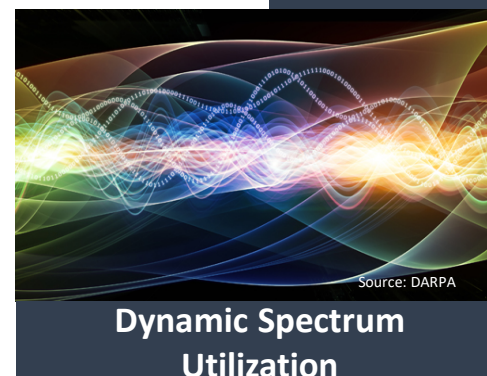

- **Accelerate** – Hasten DoD's adoption of 5G
 - At-scale test facilities that enable rapid experimentation & dual-use application prototyping
- **Operate Through** – Ensure that US forces can operate through wherever and whenever we deploy
 - Dynamic spectrum utilization
 - “Zero Trust” architectures
- **Innovate** – Enhance 5G technology and invest in future “Next G” technologies
 - There is no finish line.

Augmented & Virtual Reality

Smart Warehouse

Dynamic Spectrum Utilization
