# An Introduction to the Defense Standardization Program (DSP) and ASSIST

Latasha R. Beckman
Deputy Director, Defense Standardization Program Office, OUSD(R&E), United States

ASSIST Clinic
Tysons, VA | August 27, 2019

# Overview

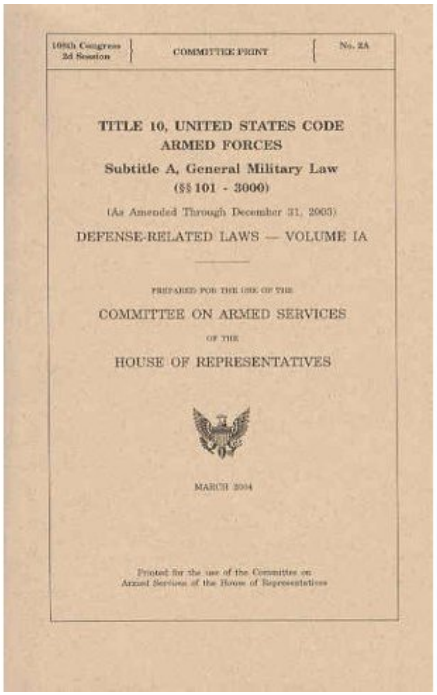
- Defense Standardization Policy and Procedures
- DoD Standardization Roles & Responsibilities
- DSPO Tools

# Standardization - It's the Law!

## Defense Standardization Program is Required by Law

Defense Cataloging
& Standardization Act
Title 10, U.S. Code Chapter 145
Section 2451-2457
(Approved July 1, 1952)

- Establishes a single, unified standardization program in DoD
- Requires standardization of items used throughout DoD to the highest degree practicable
- Requires standardization and interoperability of equipment with North Atlantic Treaty Organization members and other countries



109th Congress 2d Session | COMMITTEE PRINT | No. 2A

TITLE 10, UNITED STATES CODE
ARMED FORCES
Subtitle A, General Military Law
(§§ 101 - 3000)

(As Amended Through December 31, 2003)

DEFENSE-RELATED LAWS — VOLUME IA

PREPARED FOR THE USE OF THE
COMMITTEE ON ARMED SERVICES
OF THE
HOUSE OF REPRESENTATIVES

MARCH 2004

Printed for the use of the Committee on Armed Services of the House of Representatives

# Public Law and Federal Regulation

- **Public Law 104-113, "National Technology Transfer and Advancement Act," March 7, 1996**
  - **Preference for developing and using non-government standards** instead of government specifications and standards
- **OMB Circular A-119, Federal Participation in the Development and Use of Voluntary Consensus Standards and in Conformity Assessment Activities**
  - All **Federal agencies must use voluntary consensus standards** in lieu of government-unique standards in their procurement and regulatory activities

# Public Law and Federal Regulation

*(continued)*

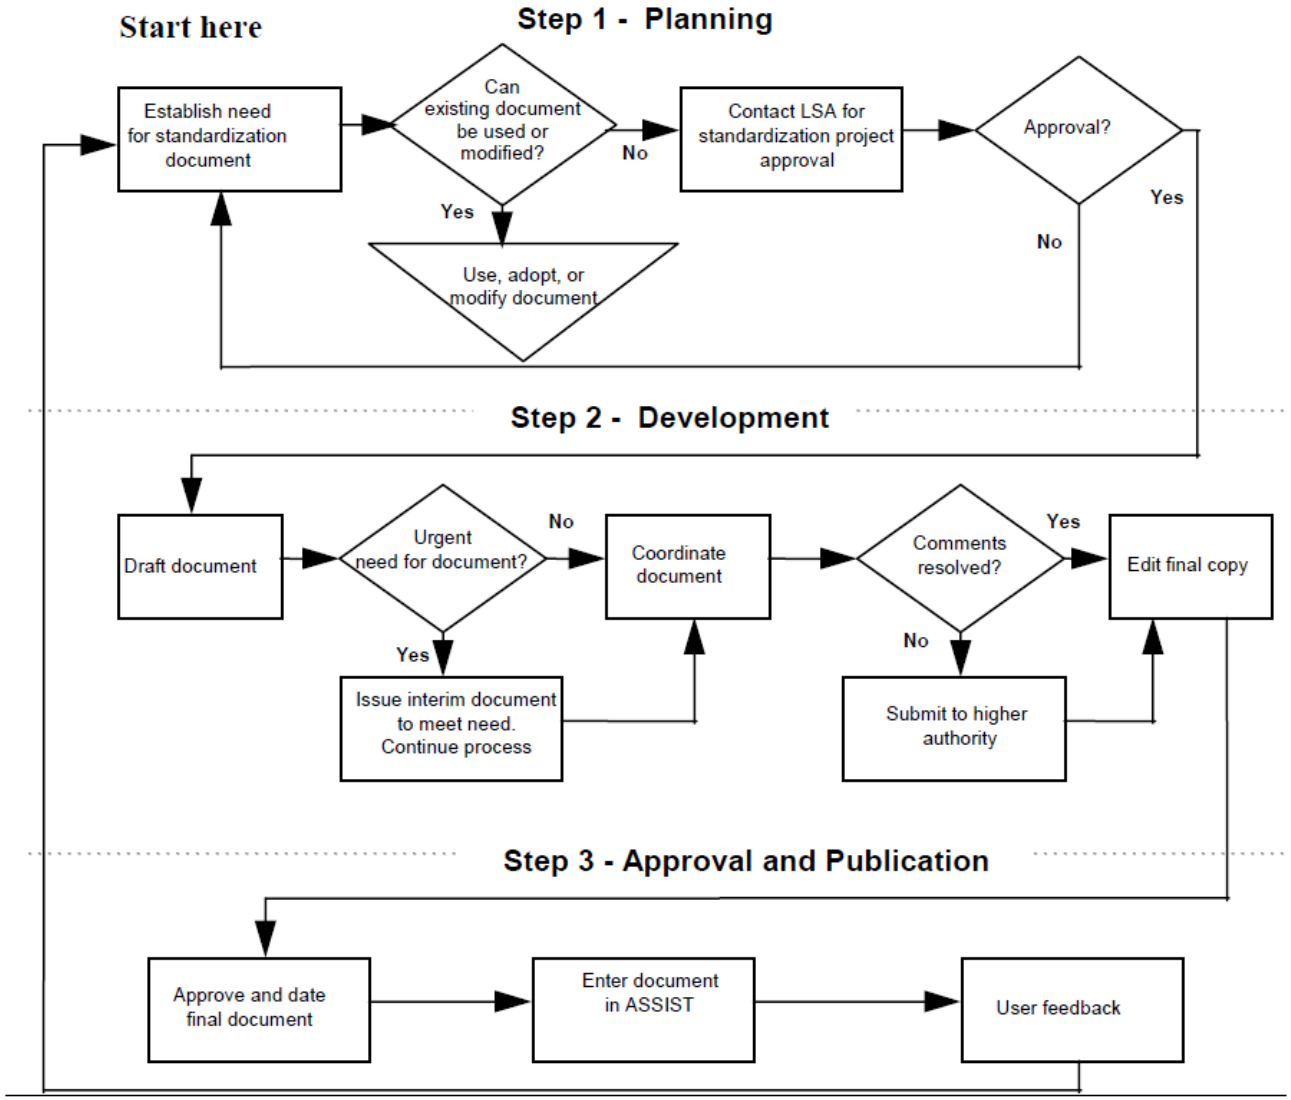
- **Federal Acquisition Regulation (FAR) paragraph 11.101(b) on Order of Precedence for Requirements Documents**
  - "In accordance with OMB Circular A-119, and Section 12(d) of the NTTA of 1995, Pub. L. 104-113 (15 U.S.C. 272 note), **agencies must use voluntary consensus standards,** when they exist, in lieu of Government-unique standards, except where inconsistent with law or otherwise impractical."
- **FAR paragraph 11.102**
  - Agencies shall select existing requirements documents or develop new requirements documents that meet the needs of the agency in accordance with the guidance contained in the Federal Standardization Manual, FSPM-0001; **for DoD components, DoD 4120.24-M**, Defense Standardization Program Policies and Procedures…
- **FAR paragraph 11.201(a)**
  - Identifies the DoD Acquisition Streamlining and Standardization Information System (ASSIST) as a source for specifications and standards cited in a solicitation
    - Note: ASSIST was developed by DSPO for the electronic indexing and distribution of DSP documents.

Distribution Statement A – Approved for public release by DOPSR on 8/10/2018, SR Case # 18-S-1848 applies. Distribution is unlimited.

# Department of Defense (DoD) Instructions and Procedures

- Chairman of the Joint Chiefs of Staff Instruction (CJCSI) 2700.01, “Rationalization, Standardization, and Interoperability (RSI) Activities"
- DoDI 2010.06, “Materiel Interoperability and Standardization with Allies and Coalition Partners”
- DoDI 4120.24, “Defense Standardization Program (DSP)”
- DoD Manual 4120.24, Defense Standardization Program (DSP) Procedures
  - Implements DoDI 4120.24

# Typical Document Management Process



# DSP Documents

- Commercial Item Description (CID) - Defines requirements for commercially available items
- Data Item Description (DID) – Provides content and format requirements for data deliverables listed on Contract Data Requirements Lists (CDRL)
- Defense Standard - Defines requirements for military unique processes, test methods, practices
- Defense Specification - Defines requirements & tests for military unique items
- Federal Specification – Defines requirements & tests for federal government unique items

# DSP Documents

*(continued)*

- Federal Standard – Defines requirements for federal government unique processes, test methods, practices
- International Standardization Agreement (ISA) - an agreement between treaty organization nations to standardize on interfaces, material, parts, equipment, etc. for military purposes (e.g., NATO STANAG)
- Military Handbook - Provides guidance for selection of items or engineering approaches
- Non-Government Standard (NGS) - a standardization document developed by a national or international private sector association, organization, or technical society that plans, develops, establishes, or coordinates standards, specifications, handbooks, and related documents.

# Formatting Standardization Documents

| | |
|---|---|
| **Defense Specification** | MIL-STD-961, Defense and Program-Unique Specifications Format and Content |
| **Defense Standard** | MIL-STD-962, Defense Standards Format and Content |
| **Handbooks** | MIL-STD-967, Defense Handbooks Format and Content |
| **Commercial Item Descriptions (CIDs) Federal Specification, and Federal Standard** | Federal Standardization Manual |
| **Data Item Description** | MIL-STD-963C, Data Item Descriptions (DIDs) |

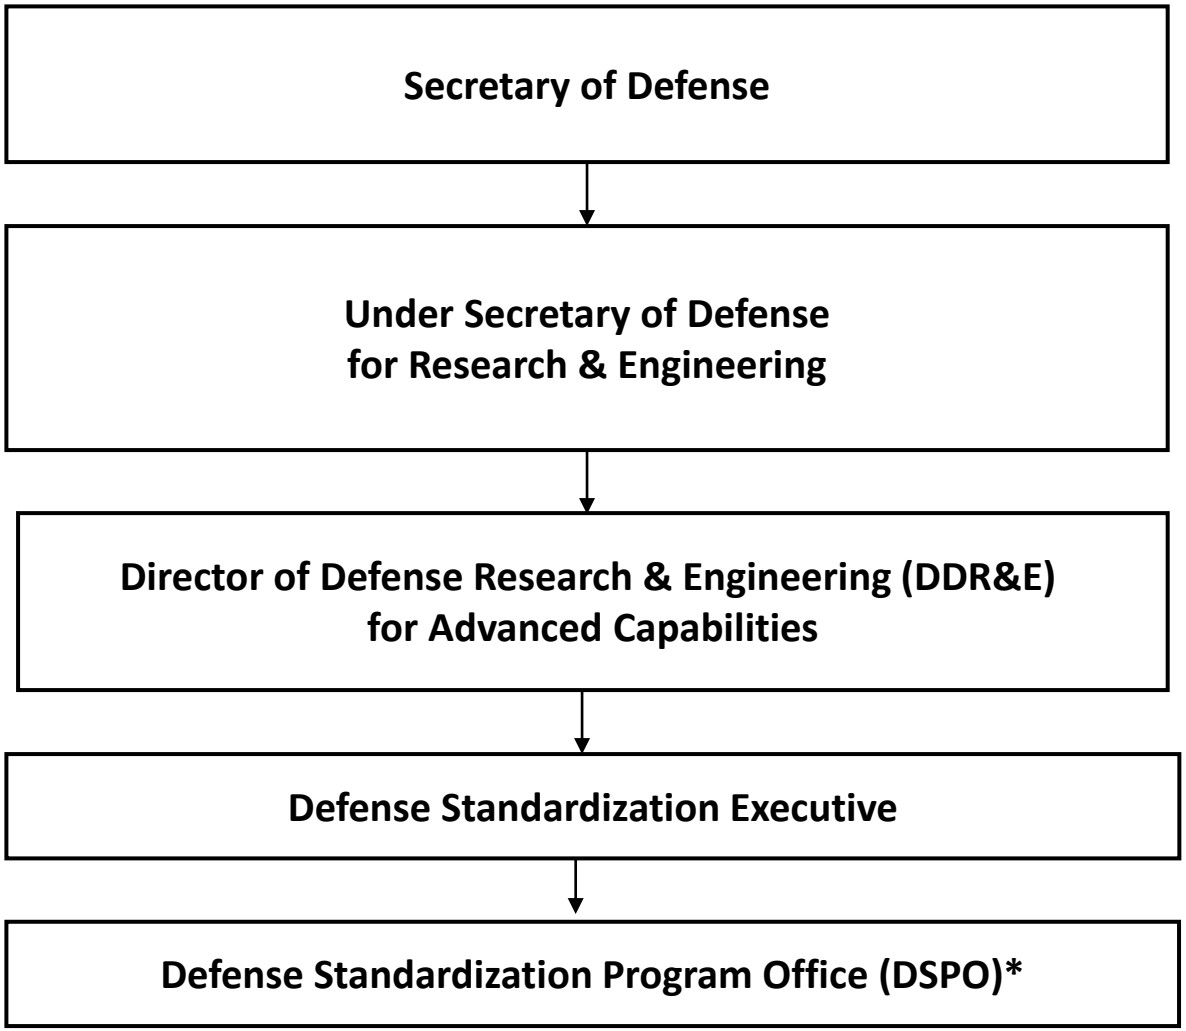
# DoD Standardization Policy Responsibilities

# The Role of DoD

- Develop and maintain standardization and interoperability policy, procedures and guidance documents
- Contribute to the technical underpinning for standards
- Participate in standards development
  - Through the voluntary process, has an equal seat at the table with other stakeholders
  - Provide U.S. representation to various international standards developing organizations (treaty and non-treaty)
- Implement standards
  - In product purchases (Government Procurement)
  - Through incorporation into regulations, doctrine and tactics
- Ensure the implementation of U.S. law and regulations concerning standards through the DoD

# DSP Policy Responsibilities



# DSPO Roles and Responsibilities

## Roles

- Carries out the day-to-day management of the DSP
- Executive Sponsor for DMSMS and GIDEP
- Champion of DSP Policies and Efforts at Senior Levels within DoD
- DoD Representative to Federal Agencies, International Organizations and the Private Sector

## Responsibilities

- Implementation of Laws, Executive Orders, and Regulations related to the DSP
- Execution of Defense Standardization Executive (DoD, SE) Decisions
- Development of DoD-Wide Standardization Policies and Procedures
- Provide Tools for Successful Implementation of Standards
- Participates in non-government standards bodies
- Assign LSAs
- Approves Joint Standardization Boards Charter

# DSPO

- International Standardization
- Joint Standardization Boards
- Counterfeit Reduction
- Non-Government Standards
- Defense Standardization Journal
- Training
- Program Management Support
- Government Industry Data Exchange Program (GIDEP)
- Parts Management
- Diminishing Manufacturing Sources and Material Shortages (DMSMS)
- Qualification
- Modular Open Systems Approach (MOSA)
- Additive Manufacturing

# DSP Management Structure

- Has authority over DSP policies
- Chairs Defense Standardization Council
- Establishes Joint Standardization Boards

**Defense Standardization Executive**

**Defense Standardization Council**

- Assist in development of DSP policies
- Provide strategic direction for DSP
- Resolve interdepartmental DSP issues

- Issues DSP policies, procedures, and guidance
- Resolve interdepartmental DSP issues

**DSPO**

**Centrally Managed**

**DepSOs**

- Plan, direct, and monitor DSP in department or agency
- Assign standardization responsibilities in department or agency

**Joint Standardization Boards**

- Identify DoD-wide standardization opportunities
- Help implement DoD-wide standardization decisions
- Advocate DSP policies, procedures, and tools

**Document Management Activities**

- Direct standardization efforts within activity
- Implement DSP policies
- Prepare or adopt standardization documents
- Review standardization documents

**Lead Standardization Activities**

- Direct standardization in FSC or Area
- Technical focal point for FSC or Area
- Ensure implementation of DSP policies
- Approve standardization projects

**Item Reduction Activities**

- Originate item reduction studies

**De-centrally Executed**

# DepSOs

- Plan, direct, advocate, and monitor the DSP in their department or agency
- Assign standardization responsibilities within their department or agency, such as Standardization Management Activities (SMAs)
- Resolve standardization issues in their own department or agency and work
- They may also designate departmental standardization activities (DSAs) for each federal supply group (FSG), federal supply class (FSC), and standardization area

# Standardization Management Activities (SMAs)

- SMAs are authorized by their Department/Agency to develop and maintain standardization documents in their area of expertise
- They may function as:
  - Lead Standardization Activity (LSA)
  - Document Preparing Activity (PA)
  - Document Adopting Activity
  - Document Custodians
  - Document Review Activity

# SMA Assignments

- **DoD standardization management assignments and materiel standards are divided along product and technology lines, and standardization areas**
  - The Federal Cataloging System, which organizes products into logical families known as Federal Supply Groups (FSGs), and Federal Supply Classes (FSCs).
  - Technologies, such as human factors, safety, information processing, and nondestructive testing, are organized into standardization areas.
- **There are currently 78 FSGs, groups, which are subdivided into 645 FSCs**
- **There are currently 115 active preparing activities with documents indexed in ASSIST**

# DSPO Tools

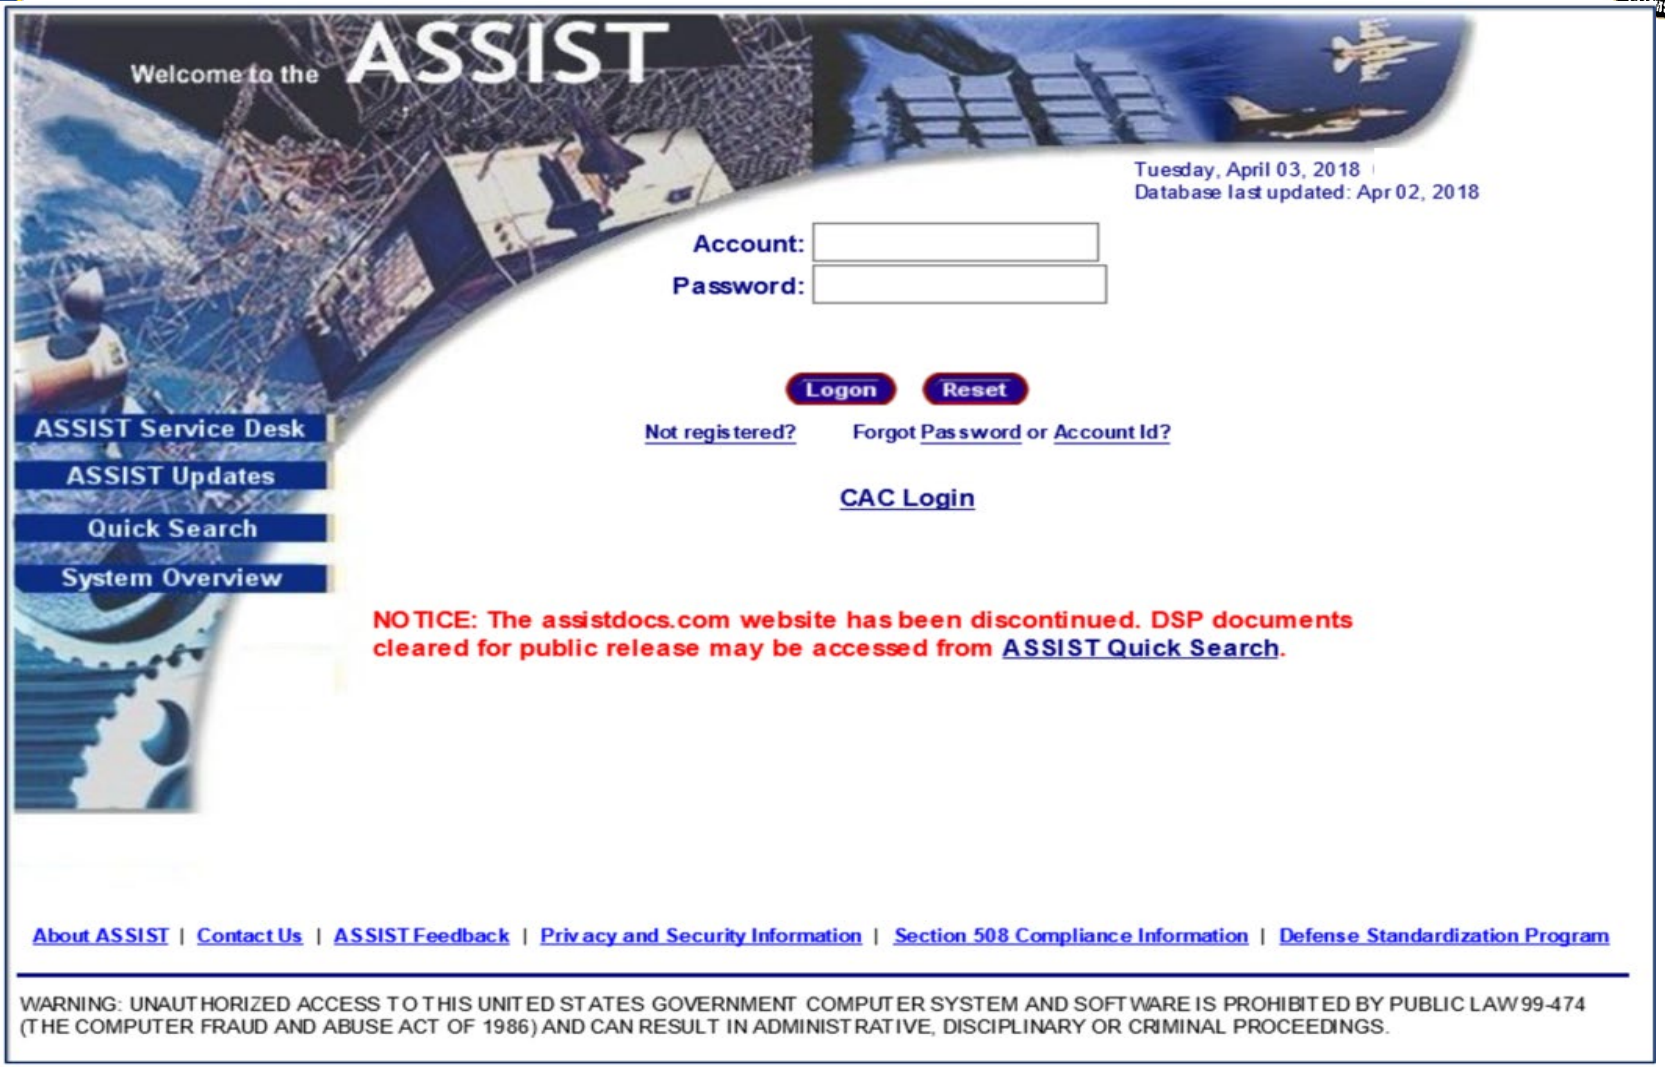
# ASSIST



**https://assist.dla.mil**

# Background

**Indexing Specifications and Standards is vital to the DSP.**

- **In 1952, Public Law 82-436 established the Defense Standardization Program (DSP)**
  - Required the creation of a single set of specifications and standards, which DoD buying activities would use in the procurement of similar items.
- **The Congress believed that a single set of specifications and standards would save money and manpower by avoiding duplication of efforts in document preparation and maintenance**
- **In 1962, the DoD established the DoD Single Stock Point (DoDSSP) to establish a single source for obtaining specifications and standards generated by the DoD.**

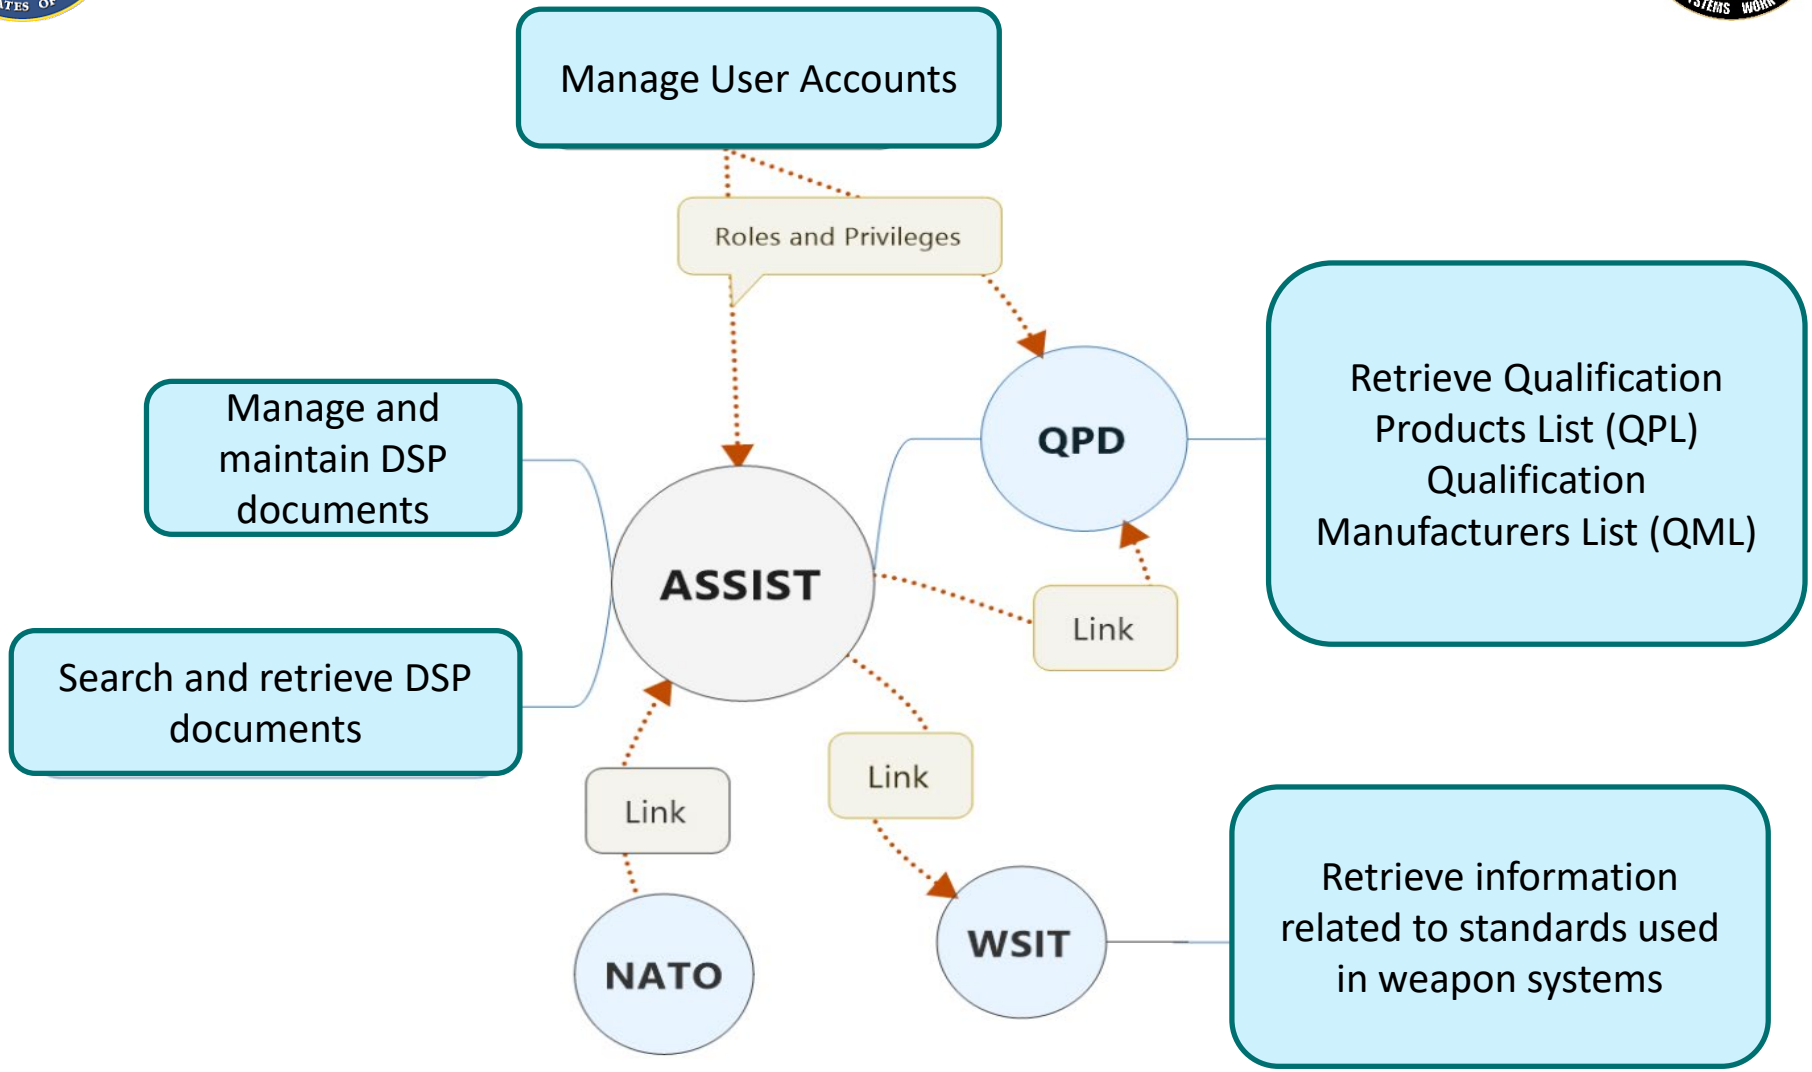
# Purpose of ASSIST

- ASSIST is the official source for standardization documents developed and used by DoD
- It is used by Standardization Management Activities (SMAs) to develop, coordinate and publish standardization documents prepared in accordance with DoD Manual 4120.24
- ASSIST helps to maintain centralized control over the physical and electronic storage, indexing, cataloging, printing and distribution of specifications and standards used by DoD
- Access to ASSIST is available to users that span the globe

# System Statistics

- **ASSIST provides an environment for 408 SMA personnel to draft, develop, and maintain DSP documents**
- **System Usage:**
  - Registered Users: 127,309
    - Active accounts: 22,188
    - Approximately 58% are DoD personnel, and 42% are commercial users
- **Document Statistics:**
  - 114,232 technical documents indexed in ASSIST

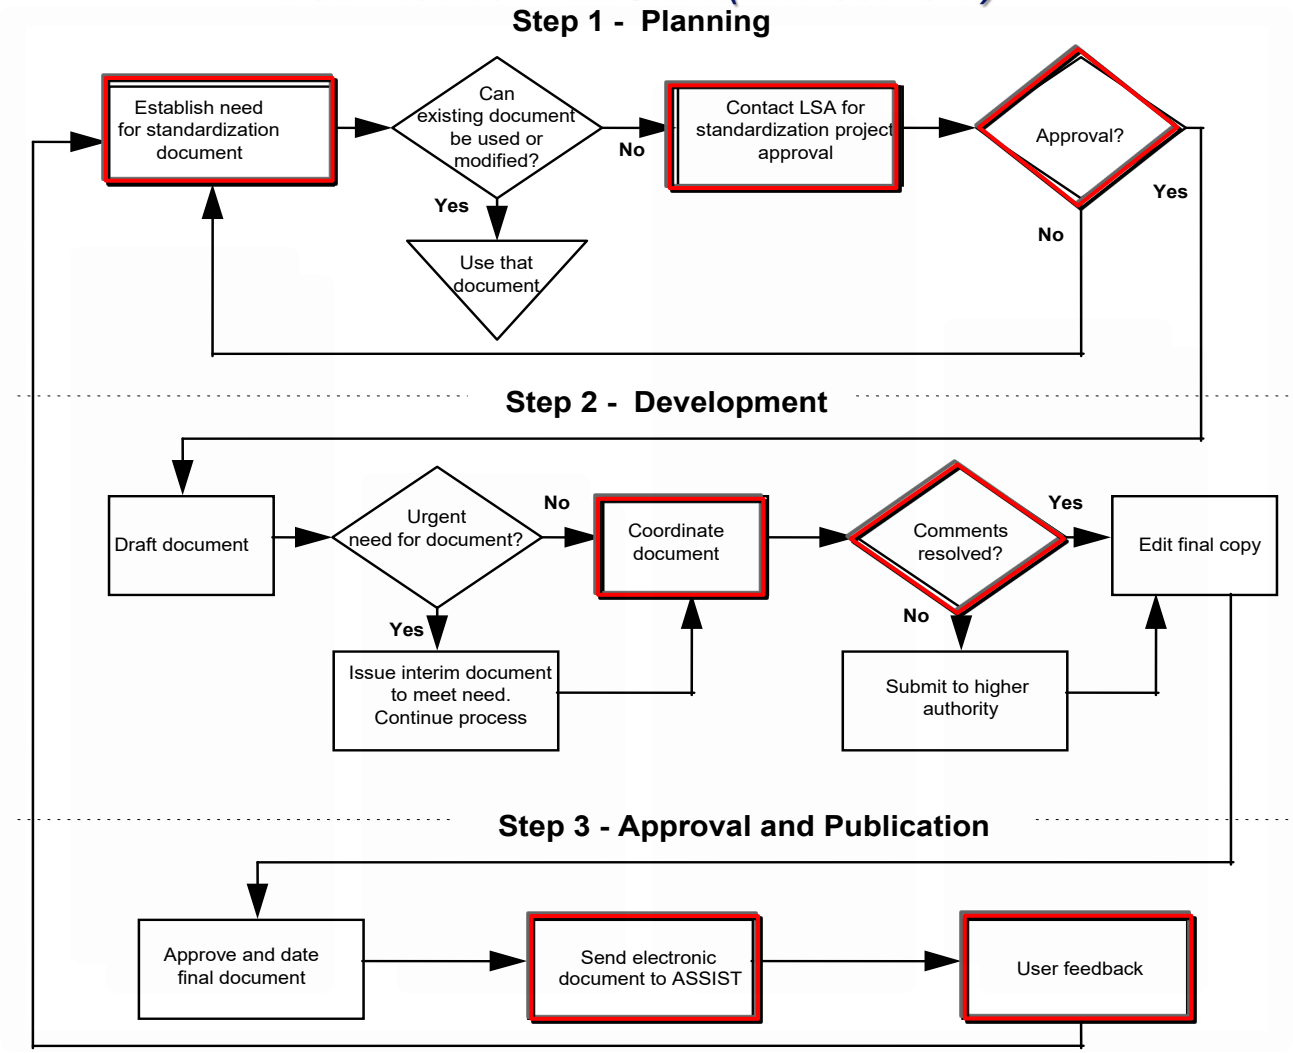
# Current ASSIST Functionality



Source: ASSIST Assessment Report (2017)

# ASSIST Interface with the Standardization Document Development Process

## DoD Manual 4120.24 (Enclosure 7)



# ASSIST Program Management

- DSPO
  - As the Executive Agent for the DSP, the Director, DSPO has the primary "ownership" responsibility for the ASSIST and provides leadership direction on system functionality
- Defense Logistics Agency (DLA), J6:
  - Serves as the Defense Standardization Program Automation Office (DSPAO)
  - Provides automation support for the DSP
- ASSIST Sustainment Contractor

# DSPAO

- **DSPAO is responsible for operating and maintaining ASSIST:**
  - Indexing and publishing new and revised DSP documents submitted by SMAs
  - Ensuring that SMAs have complied with applicable policy and procedures in DoD Manual 4120.24
  - Managing the day-to-day operations of the ASSIST Service Desk
  - Coordinating with DSPO, ASSIST Maintenance (Sustainment) Contractor, users, and other stakeholders on all ASSIST matters

# Long-Term ASSIST Goals

- Create an ASSIST that can expand and grow to address current and future requirements
- Enterprise-wide access to non-government standards
- Allow PAs to update documents in a digital form
- Distribute documents in the form of digital data

# Standards are Vital for Military Success

- Operation Enduring Freedom
- U.S. F/A-18 Hornets received fuel from British VC-10 tanker
- STANAG 3447, “Aerial Refueling Equipment”

**DSP efforts must address the needs of the warfighter.**

Fundamentals

## Overview

Title: Environmental Engineering Considerations and Laboratory Tests

Scope: This Standard contains materiel acquisition program planning and engineering direction for considering the influences that environmental stresses have on materiel throughout all phases of its service life. It is important to note that this document does not impose design or test specifications. Rather, it describes the environmental tailoring process that results in realistic materiel designs and test methods based on materiel system performance requirements. Figure 1-1 summarizes this direction.

### Overview

Title: Tactical Data Link (TDL) 16 Message Standard

Scope: The purpose of MIL-STD-6016 is to describe the approved standards to achieve compatibility and interoperability between command and control and communications systems and equipment of United States (U.S.) and coalition military forces employed or intended to be employed in joint tactical operations. This publication is to be complemented by Chairman Joint Chiefs of Staff Manual (CJCSM) 6120.01, Joint Multi-Tactical Data Link (TDL) Operating Procedures (JMTOP), which will provide for planning and common procedures to be used by forces in the joint tactical environment using Link 16 as the basis for information exchange.

Fundamentals

## Overview

Title: Real Property Facilities As-Built Drawings

Scope: Real property facilities as-built drawings are the construction drawings modified and annotated to reflect the actual completed construction effort. They are used as part of the permanent real property facility record for operation, maintenance, modification, space utilization, and planning activities related to the facility.

Reports
Document Condition Report
Generate a list of documents displaying counts of all first-tier active, inactive and canceled references within a specified date range for one or more Preparing Activities, as well as by Preparing Service. The list may be downloaded in Microsoft(R) Excel spreadsheet format.
Document Statistics
Generate a matrix report summarizing ASSIST documents by Document Category, Service, and Coordination Level. The list may be downloaded in Microsoft(R) Excel spreadsheet format.
Document Statistics by Organization
Generate a matrix report summarizing ASSIST documents for a selected Preparing Activity by Document Category, Service, and Coordination Level. The list may be downloaded in Microsoft(R) Excel spreadsheet format.
Document Statistics by Service and Category
Generate a matrix report summarizing ASSIST documents for a selected Preparing Service and Document Category. Broken down by each Preparing Activity's totals associated with the selected Preparing Service and Category. The list may be downloaded in Microsoft(R) Excel spreadsheet format.
FSC/Area Statistics Report
Generate a summary by FSC and Area of the number of active, inactive, and canceled documents indexed in ASSIST. Features filters to permit users to restrict the report to a specific Preparing Activity, LSA, or Preparing Service.
Metrication Statistics
Generate total counts of metric and non-measurement sensitive documents for a given fiscal year by preparing service and/or preparing activity.
NGS Adopted
Generate a list of DoD adopted Non-Government Standards by NGS body, status, and tier.
Source Document Summary
Generate a list of documents that are cited by DIDs for a user-specified Preparing Activity or Service. The list may be downloaded in Microsoft(R) Excel spreadsheet format.
Stabilized Document Search
Search for documents that have been designated as Stabilized. Search results may be downloaded in Microsoft(R) Excel spreadsheet format.
Standardization Management Activity Document List
(formerly the Preparing Activity Document List)

FSC/Area Statistics Report

Generate a summary by FSC and Area of the number of active, inactive, and canceled documents indexed in ASSIST. Features filters to permit users to restrict the report to a specific Preparing Activity, LSA, or Preparing Service.

Metrication Statistics

Generate total counts of metric and non-measurement sensitive documents for a given fiscal year by preparing service and/or preparing activity.

NGS Adopted

Generate a list of DoD adopted Non-Government Standards by NGS body, status, and tier.

Source Document Summary

Generate a list of documents that are cited by DIDs for a user-specified Preparing Activity or Service. The list may be downloaded in Microsoft(R) Excel spreadsheet format.

Stabilized Document Search

Search for documents that have been designated as Stabilized. Search results may be downloaded in Microsoft(R) Excel spreadsheet format.

Standardization Management Activity Document List
(formerly the Preparing Activity Document List)

Generate a list of documents belonging to a given Service, Lead Standardization Area, Preparing Activity, Custodian or Reviewer by Document Status, FSC/Area, processing transaction date or Document Date. The list may be sorted in a variety of user-selectable methods and downloaded in Microsoft(R) Excel spreadsheet format.

Standardization Management Activity Interest List

Generate a list of all documents indexed in ASSIST for which a specified Standardization Management Activity is a preparer, custodian, or maintains a reviewer interest. In addition, this report will provide a listing of documents by FSC/Area. The list may be downloaded in Microsoft(R) Excel spreadsheet format.

Standards Category Documents List

Individually lists Interface Standards, Test Method Standards, Design Criteria Standards, Standard Practices, and Manufacturing Process Standards. Features filters to permit users to restrict the report to a specific Preparing Activity, LSA, or Preparing Service and by Document Date Range and by multiple FSC/Areas. The list may be downloaded in Microsoft(R) Excel spreadsheet format.

XML Processing User Guide (Version 2.2, Feb. 23, 2017)
File Name | Description | File Size | Date Modified
Document Sources | Contains a cross-reference of Data Item Description (DID) documents and other ASSIST documents to associate DIDs with their implementing source specifications, standards, and Statements of Work. | 4 Kb | 12-MAR-2018
SMA Codes | Contains a unique list of inclusive SD-1 Standardization Activity codes used to validate document interests. | 4 Kb | 12-MAR-2018
Superseded Documents | Contains a list of superseded documents. | 122 Kb | 12-MAR-2018
Interests | Contains the SD-1 Standardization Activity Symbols for each activity having a review or user interest in a given specification or standard, categorized by SMA code. | 702 Kb | 12-MAR-2018
Agreements | Contains International Standardization Agreement information implemented by domestic U.S. standardization documents. | 5 Kb | 12-MAR-2018
Projects | Contains database information specifically related to the projects component of the ASSIST database that is responsible for maintaining standardization community project information. | 5 Mb | 12-MAR-2018
Section6 Keywords | Contains a list of keyword values identified in Section 6 of specifications or standards documents that correspond to document subjects and contents to which the document is written. | 302 Kb | 12-MAR-2018
Documents | Contains all of the primary information for all specifications and standard maintained in the ASSIST database such as Preparing Activity, custodians, document dates and other data specific to each specification and standard. | 15 Mb | 12-MAR-2018
References | Contains the majority of first reference documents cited within a given specification or standard. | 821 Kb | 12-MAR-2018
Keywords | Contains keyword values for ASSIST documents derived from their titles against which searches may be initiated. | 5 Mb | 12-MAR-2018
Other Publications | Contains agency peculiar references and other publications not cataloged in ASSIST that are cited as references for a given specification or standard. | 367 Kb | 12-MAR-2018
Document Categories | Contains the categories to which ASSIST documents are classified such as Performance Specifications, Commerical Item Descriptions, and Non-Government Standards. | 6 Kb | 12-MAR-2018

**Yesterday**

[None]

**Older**

[None]

Clear History

### Advanced search types:

**Query by National Stock Number (NSN)**

Query by NSN allows the user to view all weapon systems the NSN is used in along with the specification documents that govern the use. The results returned by the query include the specification document number, the weapon system designator code and descriptions for each.

**Query by Specification Document Number**

This query allows the user to view all the weapon systems affected by a specification. The results returned by the query include the specification document number, a description of the specification, along with the designator code and description for the weapon system. The results returned by the query include the WSDC, a description of the weapon system, and the number of NSNs in the weapon system affected by the specification.

**Query by Weapon System Designator Code (WSDC)**

Query by WSDC allows the user to view all specifications which govern the parts in the weapon system. The results returned by the query include the specification document number, a description of the specification, and the number of NSNs in the weapon system governed by the specification.

**Query by Specification Document Number & Weapon System Designator Code (WSDC)**

This query allows the user to view all the NSNs affected by a document in a weapon system. The results returned by the query include the NSN and information about the relationship between the WSDC and the document number.

*Follow the **help link** for more examples and documentation.*

My Account
Account Profile Maintenance
Allows you to modify point of contact information such as your mailing address and phone numbers. Also provides the ability to turn off e-mail notification distribution based on other profile settings.
Change Email Address
Allows you to change the email address associated with your ASSIST account. Email address must be validated by the system and conform to the agency associated with your account (Army, Navy, Commercial, etc.).
My Alert Portal
Provides the ability to view items of interest to you that have changed during the past two weeks. These items can be specified by you as part of your profile and include: individual documents, documents associated with selected FSC/Areas, document coordination efforts, newly approved projects, or revised QPLs in the Qualified Products Database (QPD).
Manage Shipping Addresses
Allows you to add/edit shipping addresses associated with your ASSIST account for purposes of ordering warehouse document components.
View Order History
Allows you to view orders you have submitted through ASSIST for warehouse document components.

## Administration

Account Manager

Provides the ability to approve, update or disable user accounts.

Alert Service Reports

Generate reports related to Alert Service usage.

Audit Reports

Produce reports that show system usage by account and time.

Canceled Reference Report

Generate a report containing active documents that have an input document id as a cancelled reference. The report may be downloaded in Microsoft(R) Excel spreadsheet format.

DID Selector Permissions

Set permissions for users editing information used by the DID Selector tool.

Document Download Metrics

Generate document download totals based on fiscal year and quarter. Also provides the ability to view the top most downloaded documents.

Extended Validation Notice Administration

Provides the ability to approve or reject user-submitted validation notices.

Generate Document Categories and Formats

Generate the Document Categories and Formats report.

Generate LSA Email Addresses

Generates a list of POC information for each LSA indexed in the SD-1. Includes Activty, POC Name, Email Address and Phone Number.

## Submit Document/EDS - Select Submission Method

EDS Home | Submit Document | Review/Update Submissions | System Overview

If you are submitting an ISA, QPL, Supplement, Administrative Notice, or Validation Notice, you are **not required** to make your submission using a **DoD Project Number**. You may start your submission by clicking on the '**Data Entry**' button below to begin the process of manually entering your **Document ID**.

If you are submitting any other type of document, click the '**Select Project**' button below to start the submission process using the appropriate **DoD Project Number** for your document. Please note, Data Item Description (DID) submissions now require an associated project.

Although it is not required to use a **DoD Project Number** to submit an ISA, QPL, Supplement, Administrative Notice, or Validation Notice, you may still do so. For example, you may wish to use the project number for tracking purposes. Click the '**Select Project**' button below to start your submission using a project number assigned to the document.

Validation Portal
Validation Notice Portal
The Validation Notice Portal provides the ability to submit requests for validation to the system administrator. Other users within your preparing activity may be able to see and work with the documents that are in your portal. To submit a document for validation, click the corresponding checkbox in the 'Validate' column. To indicate that the document is stabilized (10 year validation cycle), click the checkbox in the 'Stabilized' column, otherwise do not check. If there is no checkbox available in the 'Stabilized' column for a submittable document, the document is either Inactive, and by default already considered stabilized, or the document is Active and has already been designated as stabilized. When ready to submit, click the 'Submit' button. (* Note: if submitting a document for validation having withdrawn non-government standards (NGS) as references, you should first verify, from their source providers, that the NGS documents are still applicable.)
Search for documents to add to your portal.

### Overview

Title: Environmental Engineering Considerations and Laboratory Tests

Scope: This Standard contains materiel acquisition program planning and engineering direction for considering the influences that environmental stresses have on materiel throughout all phases of its service life. It is important to note that this document does not impose design or test specifications. Rather, it describes the environmental tailoring process that results in realistic materiel designs and test methods based on materiel system performance requirements. Figure 1-1 summarizes this direction.

Status: Active

Doc Category: Military Standard - Test Method Standard

Document Date: 31-JAN-2019

FSC/Area: ENVR

Next Review Due: 30-JAN-2024

Chg/Correction: 20-SEP-2013

References: 21

Referenced By: 1573

Intl Agreement: STANAG-4370

Sec 6 Keywords: 25

Implements ISAs: 11

DID: DI-ENVR-82121

### Responsibilities

Lead Standardization Activity: TE Army Test and Evaluation Command (ATEC)

Preparing Activity: TE Army Test and Evaluation Command (ATEC)

Coordination: Full

Army Custodian: TE Army Test and Evaluation Command (ATEC)

Navy Custodian: AS Naval Air Systems Command

Air Force Custodian: 11 Air Force Life Cycle Management Center - Aircraft Systems

Reviewer Interest: 19 (indicates number of interested reviewers)

Changes to military standards or handbooks issued after August 1, 2003 are incorporated in the modified document.

# Standardization Tools

Tim Koczanski
Program Analyst, DSPO-DS
Office of the Under Secretary of Defense
(Research & Engineering)

ASSIST Clinic
McLean, VA | August 27, 2019

Distribution Statement A: Approved for public release. Distribution is unlimited.

# ASSIST

***The primary user interface of the DSP is the ASSIST Online suite of tools. At the core of ASSIST is the repository of 28,842 active standardization documents. However, other tools can be accessed through ASSIST…***

- Qualified Products Database
- Weapons Systems Impact Tool
- Pin Point
- Training

***You can access ASSIST at https://assist.dla.mil or quicksearch at http://quicksearch.dla.mil***

Distribution Statement A: Approved for public release. Distribution is unlimited.

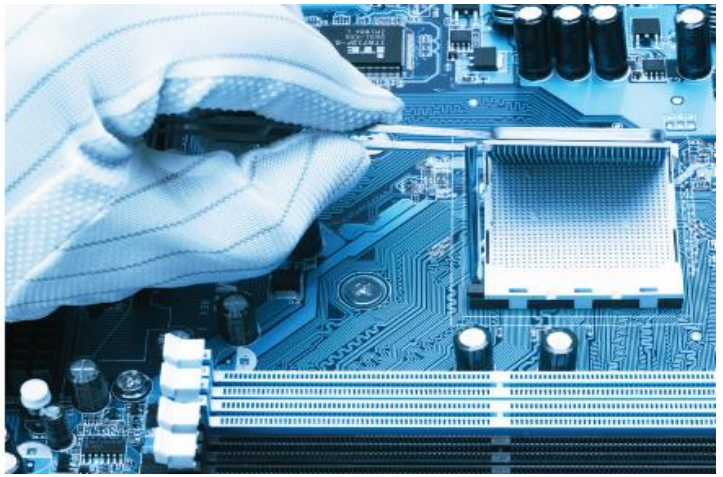
# What is Qualification

- Process of testing in advance of, and independent of, an acquisition
- Specification driven; stated in section 3
- Manufacturers who have passed the testing requirements are put on a Qualified Product's List (QPL) or Qualified Manufacturers List (QML)
- Buying activities can buy from those approved suppliers without carrying out extensive testing on the products (QPL) or processes (QML) since testing was done in advance

Distribution Statement A: Approved for public release. Distribution is unlimited.

# Functions of Qualification

- **Shorter Lead Times**
  - For acquisitions & procurements
- **Reduced Testing Costs and Improved readiness**
  - Through continuous availability of reliable products from viable suppliers
- **Products, processes, or materials of manufacturers or distributors are independently examined and tested**
  - To determine whether they conform to the specification requirements before they are acquired
- **Products and manufacturers that successfully pass the qualification are then identified on a list**
  - Qualified Products go on Qualified Products Lists (QPLs)
  - Qualified Processes and Materials go on Qualified Manufacturers Lists (QMLs)



Distribution Statement A: Approved for public release. Distribution is unlimited.

# Paper-based (PDF) QPLs and QMLs

**Prior to 2006, QPLs and QMLs were developed as paper based (PDF) documents**

- **These documents were…**
  - Static
  - Out of date
- **This created an unnecessary burden of Qualifying Activities (QAs)**
  - Only way to maintain QPLs and QMLs was through lengthy self audits in ASSIST

QUALIFIED PRODUCTS LIST

OF

PRODUCTS QUALIFIED UNDER MILITARY SPECIFICATION

MIL-T-960

TRAPS, STEAM, INTERMITTENT DISCHARGE AND CONTINUOUS

FLOW, NAVAL SHIPBOARD

This list has been prepared for use by or for the Government in the acquisition of products covered by the subject specification and such listing of a product is not intended to and does not connote endorsement of the product by the Department of Defense. All products listed herein have been qualified under the requirements for the product as specified in the latest effective issue of the applicable specification. This list is subject to change without notice; revision or amendment of this list will be issued as necessary. The listing of a product does not release the contractor from compliance with the specification requirements.

THE ACTIVITY RESPONSIBLE FOR THIS QUALIFIED PRODUCTS LIST IS THE NAVAL SEA SYSTEMS COMMAND, SEA 05Q, 1333 ISAAC HULL AVE, SE, WASHINGTON NAVY YARD, DC 20376-5160.

DISTRIBUTION STATEMENT A Approved for public release; distribution unlimited

Source: https://assist.dla.mil Downloaded: 2019-09-05 15:51:03 EDT
Check the source to verify that this is the current version before use.

Distribution Statement A: Approved for public release. Distribution is unlimited.

# Qualified Products Database (QPD)

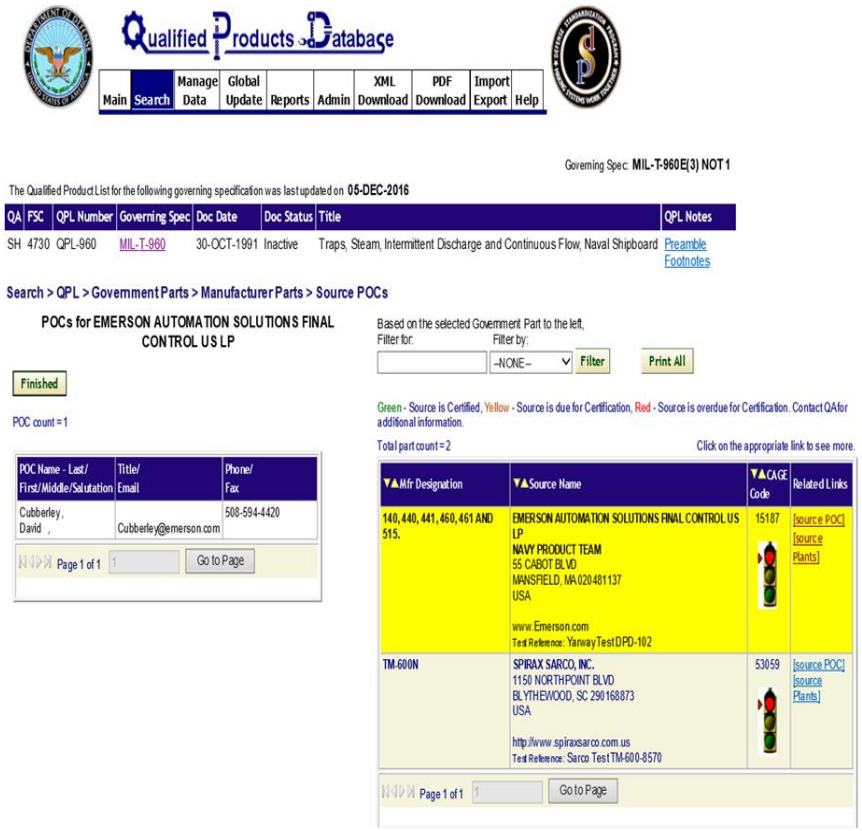
**In 2006, QPD went live, changing the way DOD QPLs and QMLs were managed**

- Electronic system
- Introduced in 2006
- System tracks retention of qualification
- Database is specification driven
- Address of manufacturers and suppliers via feed from System for Award Management (SAM)
- Allows qualifying activities the ability to manage their QPL's and QML's in a workflow system, in near real time

Distribution Statement A: Approved for public release. Distribution is unlimited.

# Qualified Products Database (QPD)

- Allows Qualifying Personnel to manage the Qualification program for their respective service
- 718 QPLs currently in the QPD containing over 13M manufacturers part numbers
- 49 Qualifying Activity Administrators (Highest role)
- 28 Qualifying Activities
- 64 Data-entry personnel
- FY 16 QPD had over 7,800,000 hits



**QPD helps Qualifying Activities manage their QPLs and QMLs**

Distribution Statement A: Approved for public release. Distribution is unlimited.

# QPD Operations

- Must have a spec that calls out qualification in ASSIST in order to create a Qualified Data Set in QPD.
- Qualified Data Sets link back to the governing specification in ASSIST
- A flag in ASSIST on the specific governing specification allows for the creation of a QDS in QPD.
- When qualification is canceled and the verification is returned to a different type of verification testing, the record in QPD must be deleted (same goes with plants)
- Addresses of qualified sources are provided by CAGE Code data pulled from GSA's System for Award Management (SAM).

**QPD is a workflow system**

Distribution Statement A: Approved for public release. Distribution is unlimited.

# Qualified Products Database

## Access is role based

| Role | Definition |
|---|---|
| Super User | Universal master administrator account-All access, all data. |
| DSPO | Universal |
| DepSO | Read Only, visibility of all status and data for a specific agency. |
| QA Admin | Can do most functions of Super User except system-level functions, but only for assigned Qualifying Activity. |
| QA | Manages the qualification program for an activity. Full privileges for activity QPLs and access to historical data. |
| Cognizant Engineer | Similar to QA, but for specific QPLs. Cannot publish |
| Data Entry | For data entry. No access to related data. Cannot publish. |
| XML | Allows users to download XML files. |
| Import/Export | Allows users to import or export large files via excel into QPD. |

Distribution Statement A: Approved for public release. Distribution is unlimited.

# WEAPONS SYSTEMS IMPACT TOOL (WSIT)

- WSIT allows users to trace the use of standards and specifications by weapons systems and parts
- With WSIT, users can assess the impact of document changes on weapon systems
- WSIT and Pin Point© work in concert, with Pin Point offering users access to structured data on government-approved component parts across the supply web

**WSIT allows program managers to view the impacts standards have on their weapon systems**

Distribution Statement A: Approved for public release. Distribution is unlimited.

# WSIT and Pin Point

## How WSIT Works

- **WSIT allows CAC users the opportunity to see what impact changes in a Spec or Standard would have on weapon systems**
- **Relates Specs and Standards to NSN and Weapon System**
  - Can show what specs and standards are important in a given area
  - Can show what NSNs are good candidates for supply chain evaluation efforts
  - Links directly from ASSIST

## How Pin Point Works

- **Provides CAC users a query engine for researching parts in the Federal supply chain**
- **Provides advanced parametric searching on physical and logistic part properties**
- **Designed to meet objectives of MIL-STD-3018 "Department of Defense Standard Practice – Parts Management"**
- **A User Interface to the Coherent View database. The Coherent View:**
  - aggregates part data from DOD databases, DOD EMALL/FedMall, GSA Advantage and NASA SEWP electronic part portals, and commercial and manufacturer websites
  - uses advanced Artificial Intelligence technology to extract and infer part properties from narrative text, specifications, part numbers, and product descriptions

Distribution Statement A: Approved for public release. Distribution is unlimited.
