

Item Name: **Modular General Purpose Tent System (MGPTS)**

NSN: 8340-01-512-0240

Description: The Modular General Purpose Tent System (MGPTS) Medium is a modular, versatile, internally arch supported tent able to provide for multi-purpose use in a comfortable weather-proof shelter in any environment. The MGPTS shelter systems are widely-used for berthing capability by the Naval Construction Force (NCF). The MGPTS Type III (18ft x 36ft) tent utilizes a tensioned fabric roof design that allows for an efficient distribution of wind, rain and snow loads from the fabric directly to the load-bearing support system.

Dimension: Length: 36 ft, (10.97M)  
Width: 18 ft (5.49 M)  
Eave Height: 7 ft (2.3M)  
Total Height: 11.5 ft (3.51m)  
Interior floor area: 648 ft<sup>2</sup> (60.2m<sup>2</sup>)

Version: Type III

Weight: 790 lbs

Erection: 36 minutes with 4 personnel.

Electrical Power: Pre-installed wiring

Construction: Folding Frame over Cover

Prime Mover: Truck or larger Vehicle

Other Characteristics: NET Training available from manufacturer or ABFC Courses: S-710-1030. Extendable by 18 ft. increments by inserting the modular intermediate section. The MGPTS Type III fits into a TRICON Container. Interior arch design – allows for an open architecture. Can be complexed at sides and/or ends by using a Standard TEMPER Vestibule. Windows and screens built into tent wall. Fabric: 19 oz. Polyester, Blackout, Tensioned System. Outer cover and liner, HVAC plenum, pre-installed floor.

**Category:** Expeditionary Facilities

Sub category: Billeting
